AGCM Fund - Asia Dividend Fund - a sub-fund of AGCM Fund RC1 (SEK) (LU2083136650)

Management Company: FundRock Management Company S.A.

Objectives and investment policy

The sub-fund aims to generate a long-term capital appreciation and dividends by investing in companies in Asia.

In order to achieve its objective, the sub-fund may invest in equity or equity-related securities of companies domiciled in Asia (including but not limited to China, Hong Kong, Taiwan, South Korea, Singapore, India, Indonesia, Malaysia, Thailand, the Philippines, Vietnam, Laos, Cambodia and Myanmar). The sub-fund will normally not invest in companies domiciled in Japan.

The sub-fund invests in particular in companies that in the opinion of the Investment Manager are expected to have a high and sustainable dividend yield supported by sustainable growth in revenues and earnings. The sub-fund is aiming at a diversified portfolio, with no particular focus on an industry or capitalization of companies.

For its investments in equities or equity-related securities of companies domiciled in China, the sub-fund may invest its assets in China B-Shares, China H-Shares and up to 30% of its net assets in China A-Shares listed on mainland exchanges of Shanghai and Shenzhen. The sub-fund will invest

and have direct access to certain eligible China A-Shares via the Stock Connect.

The sub-fund may invest in derivative instruments in order to mitigate risks.

The sub-fund may invest in any equity-related instrument on any regulated market in any OECD country outside Asia as long as a significant portion of the company's assets are based in Asia or a significant portion of the revenues are derived from Asia.

The sub-fund is actively managed without reference to a benchmark.

The currency of the unit class is SEK.

Under normal circumstances, you may sell your units any day on which banks are open for business in Luxembourg, except 24 December.

These units are capitalisation units. Income and capital gains are reinvested.

Recommendation

This sub-fund may not be appropriate for investors who plan to withdraw their money within 3-5 years.

Risk and reward profile

What does this synthetic risk and reward indicator mean?

- The units of RC1 (SEK) are classified in category 6 because the value of the unit may be subject to high variations and consequently the risk of loss and the opportunity of gain may be high.
- The risk category for this unit class was calculated using simulated and historical data. The risk category may not be a reliable indicator of the unit class's future risk profile. The risk category shown is not guaranteed and may change over time.
- The seven-category scale is complex, for example 2 is not twice as risky as 1. The gap between 1 and 2 might not be the same as the gap between 5 and 6. A category 1 sub-fund is not a risk-free investment - the risk of losing your money is small, but the chance of making gains is also limited.

Which materially relevant risks are not adequately captured by the synthetic risk and reward indicator?

- The sub-fund may use derivatives. Due to their structure, the risk associated with these investment instruments may have a larger impact on the value of the sub-fund, than buying the underlying stock or investment instrument directly.

- Counterparty risk: the risk that a counterpart does not fulfill its obligations to the sub-fund (e.g. not paying an agreed amount or not delivering securities as agreed).
- Risks associated with the Shanghai and Shenzhen Hong-Kong Stock Connect: please note that investments through the Shanghai and Shenzhen Hong-Kong Stock Connect are subject to additional risks, namely, quota limitations, suspension risk, operational risk, restrictions on selling imposed by front-end monitoring, recalling of eligible stocks, clearing and settlement risk, participation in corporate actions and shareholders' meetings and regulatory risk.
- Emerging market risk: the sub-fund may be exposed to risk of countries and markets that have less developed political, economic and legal systems.
- Concentration risk: the strategy employed by this sub-fund may lead to higher risk and volatility than a more diversified approach.
- Currency risk: the sub-fund may hold some of its investments in currencies other than the sub-fund's reference currency. Thus the value of the sub-fund may rise and fall due to currency movements.
- Operational risk: the risk of loss resulting from e.g. system breakdowns, human errors or from external events.

How can I get more information about the risks of the sub-fund?

Additional information concerning the risks of investment is indicated in the corresponding sections of the prospectus of the fund.

Charges

The charges you pay are used to cover the running costs of the sub-fund, including the costs of marketing and distribution of units. These charges reduce the potential increase in value of an investment in this sub-fund.
