What is this product?

Type

This product is a unit of a mutual fund qualifying as an undertaking for collective investment in transferable securities (UCITS).

Term

This sub-fund has no maturity date. However, the management company may decide to close the sub-fund under certain circumstances.

Objectives

The sub-fund aims to generate a long-term capital growth by investing in company shares (equities) domiciled in Asia.

In order to achieve its objective, the sub-fund mainly invests in company shares or instruments related to company shares domiciled in Asia or in any regulated market in an OECD country outside Asia if a significant portion of the company's assets are based in Asia (including but not limited to China, Hong Kong, Taiwan, South Korea, Singapore, India, Indonesia, Malaysia, Thailand, the Philippines, Vietnam, Laos, Cambodia and Myanmar).

The sub-fund invests in particular in companies that in the opinion of the Investment Manager are expected to have sustainable growth in revenues and earnings with no particular focus on an industry or capitalisation of companies. The sub-fund does normally not invest in company shares domiciled in Japan.

For its investments in equities or equity-related securities of companies domiciled in China, the sub-fund may invest its assets in China B-Shares, China H-Shares and up to 30% of its net assets in China A-Shares with the help of the Shanghai and Shenzhen Hong-Kong Stock Connect.

The sub-fund may invest in derivative instruments in order to mitigate risks.

The sub-fund qualifies as an Article 8 financial product under SFDR (Sustainable Finance Disclosure Regulation). Further information about the ESG characteristics applied is available online at the website of the Investment Manager: www.agcm.se/en/documents/sustainability.

Benchmark: The portfolio is actively managed on a discretionary basis without reference to a benchmark. However, the sub-fund is managed in reference to the EURO03M plus 5% for the purpose of the performance fee calculation, as detailed further below.

performance fee calculation, as detailed further below.

Intended retail investor

This product is offered to investors who may have basic or no knowledge and experience of investing in financial markets and also experienced investors. An investment in this product is designated to be a medium term investment and the investment horizon should ideally be at least three to five years. Investors should not expect to obtain short-term gains from such investment.

Other information

Depositary: Skandinaviska Enskilda Banken. AB (publ) – Luxembourg Branch

Dividend income: This class is a capitalisation class meaning that income is reinvested.

Conversion right: The investor has the right to convert his investment in units in one sub-fund for units in the same sub-fund or in another sub-fund. The investor can obtain information about how to convert in the prospectus of the fund.

Segregation: The assets and liabilities of a sub-fund are segregated pursuant to the law so that the commitments and liabilities of one sub-fund do not affect the other sub-funds.

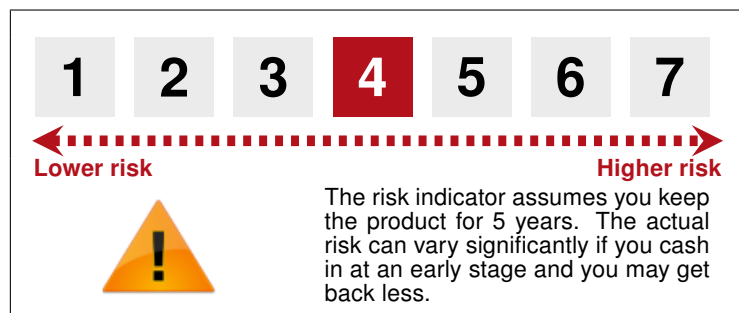

Additional information: Additional information about the fund, copies of its prospectus, the latest annual and semi-annual report and the latest prices of units may be obtained free of charge from the management company or on www.fundrock.com/funds/. The prospectus and the periodic reports are prepared for the entire fund and are available in English. The management company may inform you about other languages in which these documents are available.

This sub-fund was launched in 2014 and this unit class in 2015.

The reference currency of the sub-fund is expressed in SEK. The currency of the unit class is expressed in EUR. For this unit class, the foreign-exchange risk of the unit currency is not hedged against the sub-fund's reference currency.

What are the risks and what could I get in return?

Risk indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class.

This rates the potential losses from future performance at a medium level, and poor market conditions could impact our capacity to pay you.

Performance scenarios

Recommended holding period: 5 years Example investment: 10,000 EUR			
		If you exit after 1 year	If you exit after 5 years (recommended holding period)
Scenarios			
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs	3,280 EUR	2,680 EUR
	Average return each year	-67.2 %	-23.1 %
Unfavourable	What you might get back after costs	7,800 EUR	10,330 EUR
	Average return each year	-22.0 %	0.6 %
Moderate	What you might get back after costs	10,420 EUR	13,070 EUR
	Average return each year	4.2 %	5.5 %
Favourable	What you might get back after costs	13,480 EUR	19,010 EUR
	Average return each year	34.8 %	13.7 %

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and of a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

Unfavourable scenario: This type of scenario occurred for an investment between October 2017 and October 2022.

Be aware of currency risk. You may receive payments in a currency that differs from your reference currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

The sub-fund is also exposed to the following materially relevant risks that are not included in the summary risk indicator:

- Derivatives risk
- Counterparty risk
- Risks associated with the Shanghai and Shenzhen Hong-Kong Stock Connect
- Emerging market risk
- Concentration risk
- Operational risk

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.

Moderate scenario: This type of scenario occurred for an investment between December 2018 and December 2023.

Favourable scenario: This type of scenario occurred for an investment between February 2016 and February 2021, by referring to a benchmark.

The stress scenario shows what you might get back in extreme market circumstances.

What happens if FundRock Management Company S.A. is unable to pay out?

The Management Company is responsible for administration and management of the sub-fund, and does not typically hold assets of the sub-fund (assets that can be held by a depositary are, in line with applicable regulations, held with a depositary in its custody network). The Management Company, as the PRIIPS manufacturer has no obligation to pay out since the product design does not contemplate any such payment being made. However, investors may suffer loss if the sub-fund or the depositary is unable to pay out. There is no compensation or guarantee scheme in place which may offset, all or any, of this loss.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding period we have assumed the product performs as shown in the moderate scenario
- 10,000 EUR is invested

	If you exit after 1 year	If you exit after 5 years
Total costs	166 EUR	1,102 EUR
Annual cost impact (*)	1.7 %	1.7 % each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 7.2% before costs and 5.5% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.
